## APPENDIX D TO PART 622— SPECIFICATIONS FOR CERTIFIED BRDS

## A. Extended Funnel.

1. Description. The extended funnel BRD consists of an extension with large-mesh webbing in the center (the large-mesh escape section) and small-mesh webbing on each end held open by a semi-rigid hoop. A funnel of small-mesh webbing is placed inside the extension to form a passage for shrimp to the cod end. It also creates an area of reduced water flow to allow for fish escapement

through the large mesh. One side of the funnel is extended vertically to form a lead panel and area of reduced water flow. There are two sizes of extended funnel BRDs, a standard size and an inshore size for small trawls.

2. Minimum Construction and Installation Requirements for Standard Size.

(a) Extension Material. The small-mesh sections used on both sides of the large-mesh escape section are constructed of 15% inch (4.13 cm), No. 30 stretched mesh, nylon webbing. The front section is 120 meshes around by  $6\frac{1}{2}$
